This Certificate is to certify that

**Wannisa Wong-udomchok**

has successfully completed the online, specialization cohort

## Introduction to Python

This marks a key achievement in your journey into the world of programming. Throughout the course, you have developed a solid foundation in Python—one of the most versatile and widely used programming languages today. You've learned essential concepts such as variables, data types, control flow, functions, and working with libraries.

Beyond writing code, you've gained the ability to think logically, solve problems efficiently, and approach tasks with a programmer's mindset. These skills are applicable across countless domains—from data science and web development to automation and AI.

By completing this course, you've demonstrated both technical proficiency and a readiness to continue growing in your coding journey. You are now well-equipped to build real-world applications, explore advanced programming topics, or contribute to development projects with confidence.
